

Our sympathies to the victims of the Boston Marathon explosions

Last Modified: 16th April, 2013, 6:19 PM

We at CQB Kajukenbo Club wish to express our sympathies for victims of yesterday's tragedy.

The devices were apparently [IEDs](#) based on pressure cookers -not detonating high explosives- with added nails, BBs and the like as shrapnel.

While I question the generic use of the word "terrorism" without any current evidence and before anyone has claimed responsibility, we all look forward to the quick apprehension of the culprit(s).

May the surviving victims this grievous and cowardly attack and the families who lost loved ones find peace and closure soon.
