[Wing Chun](#) 1994 (NR) 1hr 35m

Martial arts expert Wing Chun ([Michelle Yeoh](#)) battles bandits in this magical film that provides as many laughs as it does wallops. Besides horse thieves, Wing Chun must deal with the men around her who simply can't handle a strong, independent woman. Ultimately, she must dish out "lessons" again and again until the respect for her skills is finally won. The reemergence of her childhood sweetheart, however, throws her emotions into a tizzy.

[Wing Chun kung-fu](#) is the foundation of Jeet Kune Do and at the core of our trapping range tools but this movie is pure fantasy and seems to have little or no historical value. You may find it somewhat amusing if you like kung fu movies.
